AMRIT THAPA

Laravel Developer | Technical Integration & Client Delivery

Brisbane, QLD | amritthapa555@gmail.com | linkedin.com/in/amrit-thapa555 | amritthapa.com

PROFESSIONAL SUMMARY

Laravel and PHP developer with 3+ years of commercial experience, including client-facing integration work. Delivered a Laravel Open Banking payment gateway for 18+ UK banks, working directly with each bank's technical team through testing and production release, and built and deployed web applications for government and business clients in Nepal. Used to gathering requirements, explaining technical choices to non-technical stakeholders, writing documentation, and tracing production issues across the application, database and Linux servers. Works with AWS and Docker. Completed a Master of Information Technology at James Cook University (Brisbane, 2025). Based in Brisbane (APAC time zone) with full Australian work rights.

KEY ACHIEVEMENTS

- Architected a Laravel Open Banking payment gateway integrated with 18+ UK banks, delivering full PSD2 and Strong Customer Authentication (SCA) compliance from the ground up.
- Acted as the technical contact for the teams at 18+ banks, validating integrations and resolving compatibility issues before production release.
- Gathered client requirements and turned them into technical specifications, working with stakeholders through the full delivery lifecycle on Laravel client projects.
- Completed a Master of IT at James Cook University (Brisbane) in 2025, applying research skills to real-world software engineering contexts.

TECHNICAL SKILLS

Laravel & Web Applications

Laravel	**PHP 8.x**	**MySQL / MariaDB**
REST APIs / JSON	**Blade / JavaScript (ES6+)**	**OAuth 2.0 / SCA**

Cloud & Infrastructure

AWS	**Docker**	**Linux / Bash**
Git & GitHub	**FTP / SFTP / SSH**	**Webhooks**

Client & Delivery Skills

Requirements Elicitation	**Technical Documentation**	**Stakeholder Communication**
Agile / Scrum / Kanban	**Jira & Confluence**	**Postman (API testing)**

WORK EXPERIENCE

Web Developer (Internship) | Lance Montana | Brisbane, QLD *May 2025 – Jul 2025*

- Looked after multiple WordPress client sites each month, covering full backups, core and plugin updates, and malware scanning.
- Diagnosed and fixed client-reported issues and customised themes and plugins to client specifications.
- Deployed changes and maintained sites remotely via FTP, SFTP and SSH, and took part in sprint planning, code reviews and team meetings.

Open Banking Integration Engineer | Wonderful Payments Limited | London, UK (Remote) *Nov 2020 – Sep 2022*

Freelance: Nov 2020 – Dec 2021, converted to a full-time position: Dec 2021 – Sep 2022

- Architected and delivered a Laravel-based Open Banking payment gateway integrated with 18+ UK banks via PISP payment initiation APIs.

- Coordinated directly with technical teams at 18+ banks to validate API integrations and resolve compatibility issues before production release.
- Implemented OAuth 2.0 and Strong Customer Authentication (SCA) to satisfy PSD2 regulatory requirements and protect customer transactions.
- Managed the full payment lifecycle: request handling, real-time status monitoring, webhook processing and automated customer notifications.
- Ensured GDPR compliance through end-to-end data encryption, two-factor authentication, and detailed audit and error logging.
- Designed a customer-facing Laravel/Blade and JavaScript interface for payment authorisation, consent management and transaction history.
- Took part in daily stand-ups and sprint planning, tested API changes with Postman before release, and fixed bugs raised during QA.

PHP Developer | Young Minds Creation (P) Ltd | Kathmandu, Nepal *Apr 2018 – Nov 2020*

- Gathered and translated client requirements into technical specifications, collaborating with stakeholders throughout the full delivery lifecycle.
- Worked on office digitisation projects for Nepal government bodies, moving paper-based processes such as record keeping, approvals and reporting into online systems that were faster to use and easier to track.
- Managed deployments and maintained production applications on Linux servers using SSH, shell scripting and Git-based workflows.
- Designed and developed RESTful APIs and server-side logic covering authentication, role-based access control, CRUD operations and automated reporting.
- Progressed from intern to mid-level developer, independently owning features across multiple client web applications built with PHP and Laravel.
- Handled day-to-day bug fixes and small change requests from clients, and joined regular team meetings to plan and review ongoing work.

EDUCATION

Master of Information Technology
James Cook University — Brisbane, QLD | Sep 2023 – Oct 2025

Bachelor of Science — Computer Science & Information Technology
Kathford International School of Engineering & Management — Kathmandu, Nepal | Apr 2013 – May 2017
